Message from the Conference Chair

Welcome to CNSI2012 in Jeju Island. It is our great pleasure to welcome you to CNSI2012 held in this beautiful place, Jeju Island.

Jeju Island is an international leisure city. In 2007, the island was listed as UNESCO's World Nature Heritage and became one of the New7Wonders of Nature in the world last year. The island is covered with unique dark gray volcanic rocks and volcanic ash soil, and hundreds of Oreums (secondary volcanoes) which are very good places to enjoy around the whole island. For ICT technologies, Korea was designated as a leading country in Smart Grid technology. A few years ago, Korean government planned a national Smart Grid project and designated Jeju Island as a test-bed of Smart Grid in 2009 according to a new national vision for green growth.

The International Conference on Computer, Networks, Systems, and Industrial Applications is hosted and sponsored by LINC Center in Jeju National University, the Institute of Information and Science Technology, DAUM, KT, and etc. We thank all of the organizations and people who are involved. The purpose of CNSI is to bring together researchers and practitioners from academia, industry, and government to exchange their research ideas and results and to discuss the state of the art in the areas of the conference. We fully believe that Jeju Island is a nice place to do it and experience lots of new technologies including Smart Grid, and etc.

We would like to thank the Program Co-chairs, Dr. Yung-Cheol Byun, Kiyota Hashimoto, Hongwei Zeng. Also, we thank all of the committee members of CNSI2011 who did lots of works for the success of this conference. And most importantly, we would like to thank all the authors for sharing their ideas and experiences through their outstanding papers contributed to the conference.

Khi-Jung Ahn
